SÃO PAULO (Brazil)

ACUPUNCTURE, GYMNASTICS AND AEROBICS CLINIC

Felinto França is a professor and specialist in clinical acupuncture, aerobic gymnastics and biosymmetry. He has developed a novel weight-loss method, which has no side-effects and does not require injections or medicines. This method, KIBERON, is attracting attention as a natural method that does not require a diet. KIBERON is a treatment for the face and body which works like natural plastic surgery, rejuvenating tissues and making aesthetic corrections. In 15 minute sessions fat is dissolved away with the use of hot towels, massages and oriental touch techniques, and it is excreted naturally from the body. Felinto França guarantees that the method removes excess weight, eliminates cellulite, flaccidity, depression, colic and even frigidity. Needles are not used. Felinto's secret lies in the fact that he uses the tips of his fingers to stimulate certain vital points. KIBERON removes local fat, models the body, strengthens the immune system, controls hormones, arterial pressure and has other benefits. It is the healthy connection between a being and health and beauty.

Клиника предлагает уникальный метод похудения профессора Фелинто Франша, специалиста по лечебному иглоукалыванию и гимнастике. "Киберон" - это лечебная процедура для тела и лица, которая обладает натуральным пластическим эффектом, омолаживает кожную ткань и производит эстетическую корректировку. За 15-ти минутные сеансы рассасываются отложения жиров при помощи тёплых полотенцев и массажей. Благодаря этому методу можно похудеть, избавиться от целлюлита, дряблости кожи, победить депрессию. Метод также укрепляет иммунную систему, приводит в норму давление и гормоны.
